

## HOWTO:

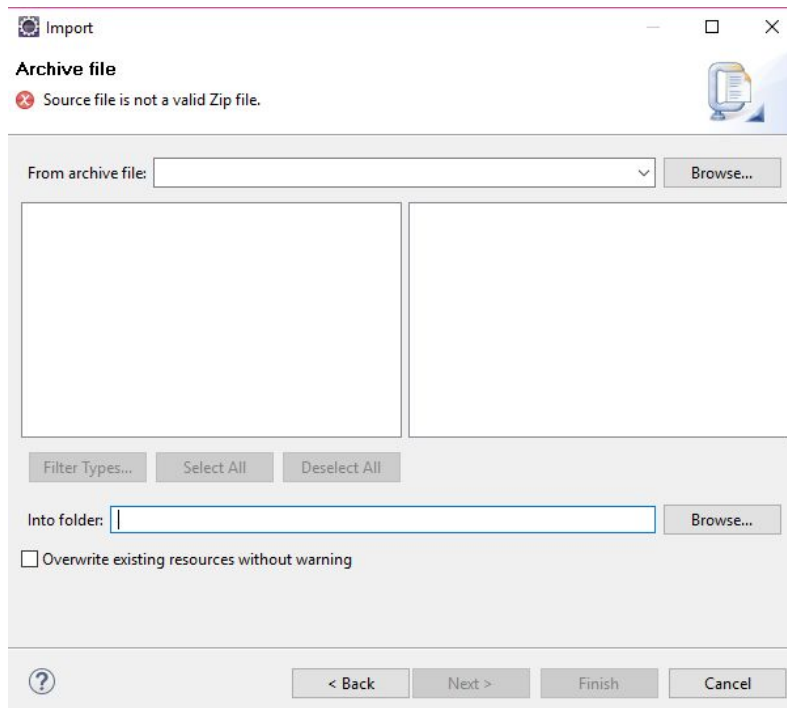

1. Open Eclipse
2. Go to File > Import

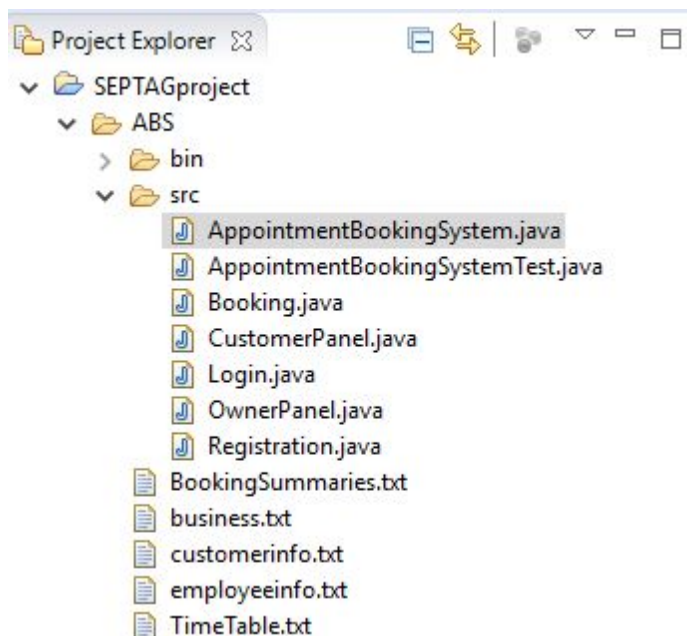

3. Select General > Archive File

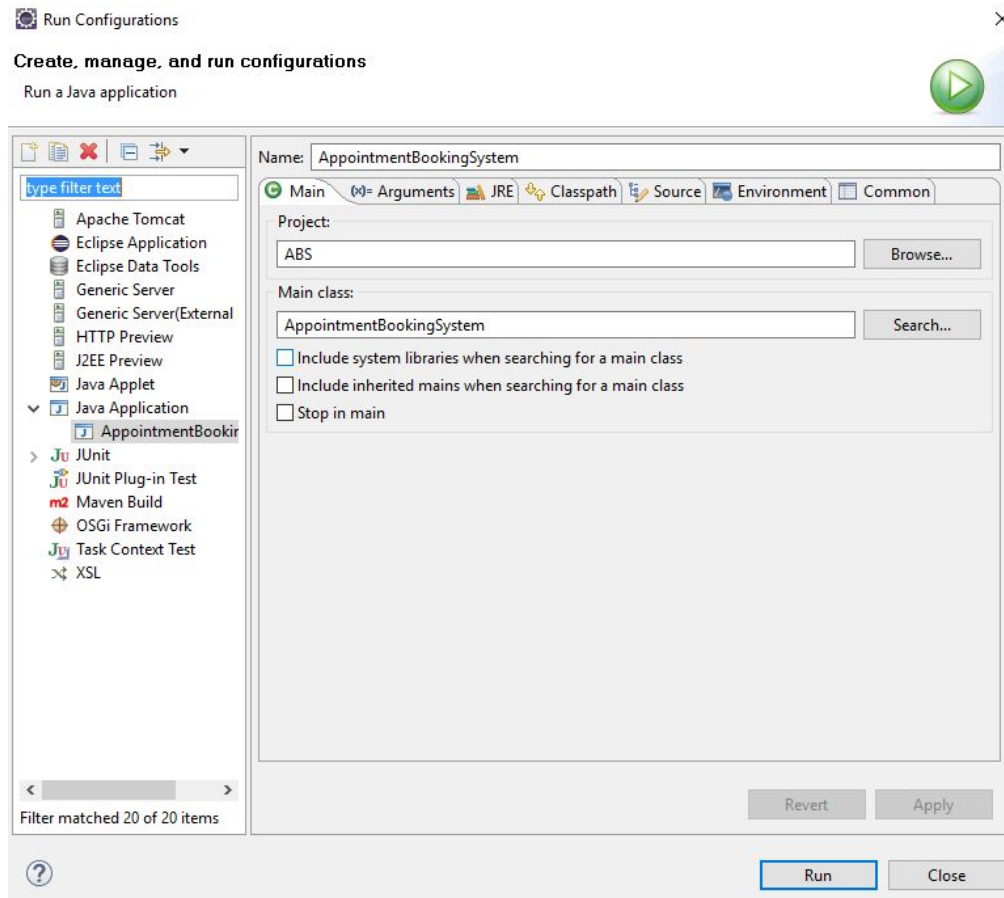

4. Click Browse and Choose the .zip file containing the source code (SEPTAG\_project.zip)

5. Once imported, expand folders to see src folder and right click on AppointmentBookingSystem.java > Run As > Run Configurations

A window should appear, ensure it looks as follows then click Run.

6. The system should run in console and appear as:

```
Welcome to Appointment Booking System:
```

1. Login
2. Register
3. Terminate
